

# Environmental, Health, and Safety Compliance Services

Whether responding to an EPA notice of violation, an unexpected visit from OSHA, or an improperly shipped DOT hazardous material (hazmat), our goal is to turn Environmental, Health, and Safety (EHS) compliance into a competitive edge for your company. In fact, effective management of EHS responsibilities can reduce operating costs, increase productivity, and reduce regulatory fines and liabilities. By partnering with our clients, we address their EHS concerns with tailored, cost-effective, and appropriate solutions.

## EHS Compliance Audits

Our teams audit EHS programs for statutory, regulatory, and internal policy compliance; best practices usage; and adherence to national and international standards. Our flexibility provides your company with a wide range of options including:

- Designing and implementing a tailored audit program
- Conducting an independent third party audit
- Providing technical auditors and audit team leaders to work with your in-house staff
- Developing customized audit protocols and self-assessment tools

Apex's EHS compliance audits are solution-oriented. We can help you attain and maintain full regulatory compliance and a safe work environment in a cost-effective and timely manner. Our audit services include:

- Identification of non-compliance areas
- Corrective action recommendations, prioritization, implementation, and tracking
- EPA, OSHA, and DOT record keeping systems and evaluations
- On-the-job incident, injury, and illness record keeping review (OSHA 300 Log)

- Hazard identification and control
- Engineering and administrative control design and implementation
- Electrical safety, lockout/tagout, and NFPA 70E
- Confined space entry management
- Employee exposure monitoring and assessment
- Environmental permits; spill prevention control and countermeasure (SPCC), pollution prevention (P2), and stormwater pollution prevention plans (SWPPP)
- Hazardous and non-hazardous waste management
- Emergency Planning and Community Right-to-Know Act (EPCRA) Tier I/II and Form R submittals/corrections to past submittals
- Biennial Resource Conservation and Recovery Act (RCRA) hazardous waste reporting
- Integrated compliance plans to simplify your facility's spill, emergency response, and contingency plans

## EHS Program Development

An effective EHS management program must be customized to your industry's and more importantly, your company's specific needs. There is no "one size fits all." Apex will design your program to incorporate tools such as regulatory databases, waste tracking and reporting software, or custom designed software to manage all of your environmental data. We can help you maintain compliance while supporting and optimizing the operations of your facility.

## EHS Training

Apex's tailored training programs help minimize incidents, limit potential liability, and ensure compliance with regulatory requirements. Our training courses include:

- Facility-specific RCRA training
- Emergency preparedness and response
- All levels of HAZWOPER
- Forklifts and cranes
- Lock-out/tag-out
- Confined space entry
- Hazcom and chemical hygiene
- Asbestos, mold, and lead
- DOT hazmat function-specific and security

## Staff Qualifications

Apex's EHS professionals, who possess in-depth expertise in OSHA, EPA and DOT regulations, include:

- Certified Industrial Hygienists
- Certified Safety Professionals
- Public Health Specialists and Toxicologists
- Engineers
- Emergency Response and Fire Safety Specialists

## About Apex

Established in 1988, Apex is a national multidisciplinary consulting, engineering, and field services firm with a robust portfolio of capabilities in water resources, environmental services, health & safety, construction management, transportation, and compliance & assurance. Rated #16 as an *ENR* All-Environmental firm and #68 in the top 200 overall, we are known for our technical expertise, rapid response, operational integrity, and exceptional client satisfaction. We operate in all 50 states and maintain a highly capable and diverse team of scientists, engineers, technicians, and information management specialists.
