

Industrial Stormwater Compliance

Reduced Runoff and Sustainable Savings

When it Comes to Stormwater, Turning Compliance Costs into Sustainable Savings is Key. Apex can quickly and cost-effectively tackle regulatory requirements, site conditions, potential contaminants, erosion challenges, and unpredictable weather conditions.

Our comprehensive solutions include inspections, evaluations, maintenance, sampling and monitoring, and plan development. Whether you need a structural or programmatic solution, our practical approach tailored to your site-specific needs can help you achieve and maintain compliance.

Industrial Solutions

- Annual compliance evaluations
- Quarterly stormwater pollution prevention plan (SWPPP) inspections
- Quarterly visual sampling assessments
- Benchmark sampling and reporting
- SWPPP/spill prevention, control, and countermeasure (SPCC) plan development
- Onsite program training
- Permitting assistance
- Engineering design
- Water treatment
- Hydraulic routing and modeling

ARTEMIS®

- Configurable cloud-based environmental information management system

Construction Solutions

- Erosion and sediment control (ESC) design and inspections
- SWPPP plan development
- Turbidity monitoring/soil sampling
- Bond release inspections
- Best management practice (BMP) installation and maintenance
- Site restoration
- Permitting

Post-Construction Solutions

- MS4 support
- Inspections and audits
- Maintenance, retrofits, and repairs
 - Detention ponds
 - Inlets and curbing
 - Troubleshoot site drainage
 - Proprietary stormwater systems
- Repair and work order tracking
