Telework Training

Virtual Health and Safety Education Sessions

Serious, non-fatal workplace injuries account for nearly \$60B in US workers' comp costs. About \$16B of those claims (e.g. slips, trips, and falls; and repetitive motion) can still occur while your employees are working from home.

Training at-home employees will reduce your liability while ensuring they're ready when normal business resumes.

Whether you're grappling with ways to safely protect your at-home workforce or seeking to hone their health and safety skills, we can help. Either select a topic below or let us help you craft a personalized, virtual (online) health and safety training session.

Why Apex?

Established in 1988, Apex is a national multidisciplinary consulting and engineering services firm with a robust portfolio of capabilities in water, environmental, health and safety, construction management, transportation, compliance and assurance, and infrastructure. We operate in all 50 states and maintain a highly capable and diverse team of scientists, geologists, engineers, technicians, and information management specialists. For more information, contact us.
