

Construction Services

At Apex, we are focused on delivering value to our clients in a way that often exceeds expectations.

Apex provides support for some of the most challenging construction projects, often in emergency circumstances or based on engineered plans. As a licensed general contractor (GC) we support many end markets, transportation and logistics, distribution and retail, power and transmission, and companies across all segments of the energy sector, as well as other GCs.

We Understand Construction

We offer comprehensive contracting services, or we can package construction with our in-house design and engineering solutions to provide turnkey, design-build projects. From design, through permitting, to placing the final stroke of paint on the project, we can do it all, nationwide.

Pavement Construction Services

- Asphalt and parking lot total replacement including base (Geogrid and fiber)
- Concrete parking lot total replacement (Geogrid and fiber)
- Small site work projects (1 to 2 acres)

Utility Construction Services

- Wastewater treatment plants (commercial)
- Installation, repair, and maintenance of sanitary lift stations
- Gravity and force main sewer installation
- Water line and gas line trenching
- Fuel tank removal, installation, and inspections (aboveground and underground storage tanks)

Stormwater Systems Construction Services

- Rainwater harvesting
- Excavation of most any type including clearing, grubbing, and tree removal
- High-hazard dam repair and regrading

- Catch basin repair or complete replacement
- Stormwater manhole structure installation or replacement
- Stormwater piping installation repair (any type reinforced concrete pipe [RCP], high density poly ethylene [HDPE], and corrugated metal pipe [CMP])
- Stormwater Pipe lining (Gunnite, cured in place [CIP], and Snaftite)
- Stormwater retention system (design and build)
- Bioretention filters, sand filters, and swale
- Best management practice (BMP) installation and maintenance (rain gardens, Filterra systems, and underground vaults)
- Pond upgrades/restoration, sediment removal, and cleaning

Stream Restoration Construction Services

- Set up diversion/pump around/sandbags
- Erosion and sediment controls
- In-stream grading
- Install step pools, riffles, and log-drops
- Stonework (imbricated, rip rap, and gabion baskets)
- Restoration (seeding/planting)
