- Pandemic-related industrial hygiene services
- Building health-related industrial hygiene sampling and consulting
- ARTEMISSM

Service area(s): National

Engagement Date: 2018 to Present

Challenge

With thousands of retail and grocery stores across the US, our client is responsible for managing stormwater and environmental compliance at its many locations.

Solution

Apex has provided our client with comprehensive stormwater maintenance services at thousands of its retail locations. This includes the maintenance of catch basins, curb drains, and conveyance channels; maintenance of vegetation associated with stormwater best management practices (BMPs), such as swales and ponds; and overseeing the client's BMP repair and rehabilitation program.

In addition, Apex has provided environmental spill response and flooding response support, as well as COVID-related facility disinfection and indoor environmental quality (IEQ) support, including mold investigations and remedial oversight.

Results

Apex serves as program manager over the client's national stormwater compliance program, seeking ways to improve and replicate best practices across its many locations. This allows our client to cost-effectively manage compliance requirements while reducing its liabilities. As the client seeks to expand its footprint, it relies on Apex to serve as its subject matter expert around water compliance and program management.
