About Apex

Making a Sustainable Impact on Our Communities Now and Into the Future

Established in 1988, Apex Companies, LLC (Apex) is a national consulting, engineering, environmental, water, and infrastructure services firm delivering multidisciplinary expertise across every stage of the project and asset lifecycle. With professionals located throughout the United States, Apex combines local knowledge with national resources to help clients improve performance, manage risk, support regulatory compliance, and create lasting value.

OUR PRACTICE AREAS

Environmental

Organizations face increasingly complex environmental, health and safety, and sustainability challenges. Apex delivers integrated solutions that help clients identify risk, maintain compliance, protect natural resources, and support sustainable operations.

Transportation & Civil Engineering

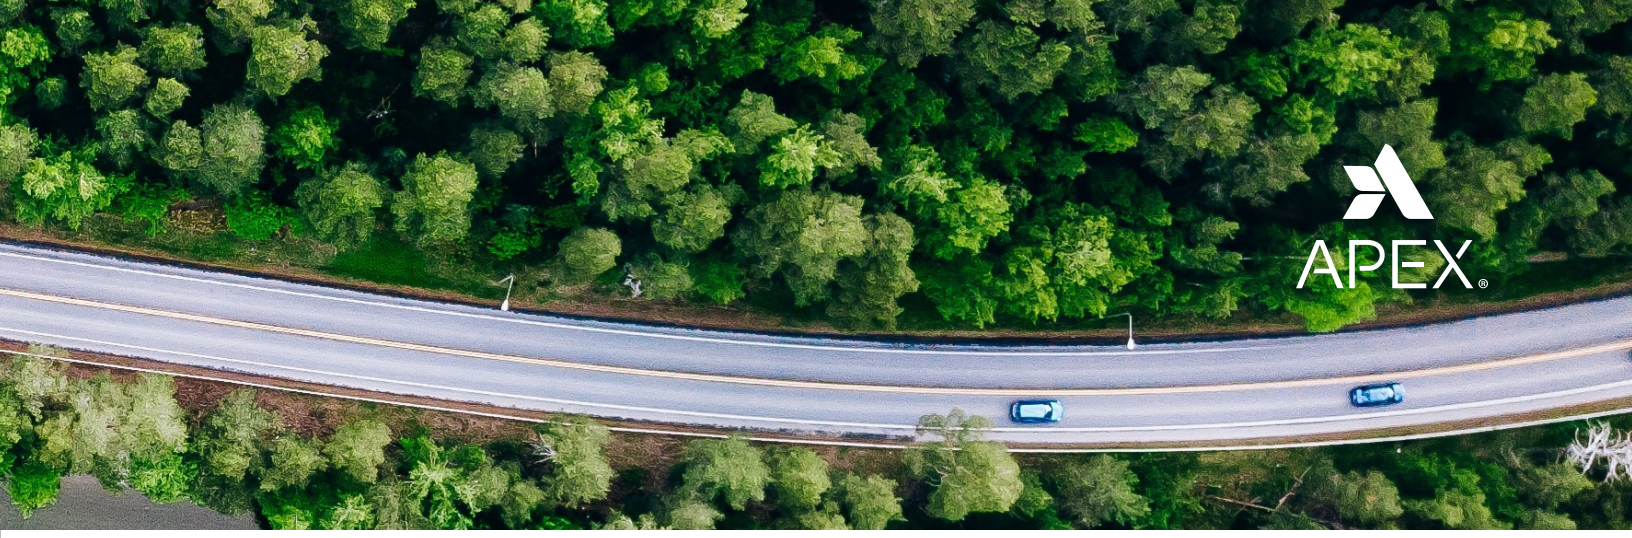

From transportation planning and roadway design to municipal infrastructure and private-sector site development, Apex delivers integrated transportation and civil engineering solutions that improve infrastructure performance and support successful project delivery.

Stormwater

Effective stormwater management requires proactive planning, regulatory expertise, and resilient infrastructure. Apex helps clients protect water quality, reduce flood risk, improve system performance, meet compliance obligations, and strengthen community resilience.

Water Infrastructure

Reliable water infrastructure is essential to healthy communities. Apex delivers integrated water, wastewater, and reclaimed water solutions that improve system performance, optimize operations, support regulatory compliance, and strengthen long-term reliability.

MARKETS WE SERVE

Apex partners with public- and private-sector organizations across diverse markets, delivering integrated solutions that help clients plan, build, enhance, operate, and maintain critical infrastructure and facilities. Our cross-market experience helps clients solve complex challenges with confidence.
