

# Industrial Hygiene

Our expert industrial hygiene consultants deliver best-in-class services to help you anticipate, identify, assess, and control workplace hazards that impact the health of your workers and customers.

As one of the largest independent IH practices in the US we have a wide breadth of safety professionals including Certified Industrial Hygienists (CIHs), Certified Safety Professionals (CSPs), Certified Professional Ergonomists (CPEs), Certified Occupational Hearing Conservationists (COHCs), air quality specialists, ISO Lead Environmental Management System Auditors, process safety management professionals, and field technicians.

With a nationwide footprint, Apex delivers cost-effective, agile projects and can quickly adapt when you need it most. We combine advanced data collection and analysis with proven strategies to protect your company, people, and assets while ensuring compliance with federal, state, and local occupational health regulations. Supported by highly credentialed, continuously trained staff, we provide cutting-edge exposure assessment techniques and technical expertise to help you maintain safe, productive, and efficient operations.
